The Technical Committee 39 for ECMAScript is working on standardization of a function that loads additional code: 'proposal-dynamic-import'.. js org/Webpack-dev-server can be used to quickly develop an application See the development guide to get started.. config.js This file is used to define rules, plugins, etc , for a project (Webpack is highly extensible via rules which allow developers to write custom tasks that they want to perform when bundling files together.. Support loaders to preprocess files, i.e. Json, jsx, es7, css, less And your custom stuff.. [9]Webpack Dev Server[edit]Webpack also provides a built-in development server called Webpack Dev Server that can be used as an HTTP server for serving files while developing. 0041d406d9 [star](#)
